4.2.1 Detailed Description

This has the data structures and prototypes (both internal and external) for an OpenSSL-based HPKE implementation following draft-irtf-cfrg-hpke.

I plan to use this for my ESNI-enabled OpenSSL build when the time is right, that's: https://github. ← com/sftcd/openssl)

4.2.2 Function Documentation

4.2.2.1 hpke_ah_decode()

decode ascii hex to a binary buffer

Parameters

ahlen	is the ascii hex string length
ahstr	is the ascii hex string
blen	is a pointer to the returned binary length
buf	is a pointer to the internally allocated binary buffer

Returns

zero for error, 1 for success

4.2.2.2 hpke_enc()

10 File Documentation

```
unsigned char * senderpub,
size_t * cipherlen,
unsigned char * cipher )
```

< Our error return value - 1 is success

4.3 hpkemain.c File Reference

An OpenSSL-based HPKE implementation following draft-irtf-cfrg-hpke.

```
#include <stddef.h>
#include <stdio.h>
#include <stdint.h>
#include <stdlib.h>
#include <string.h>
#include <getopt.h>
#include <openssl/evp.h>
#include <openssl/ssl.h>
#include "hpke.h"
```

Include dependency graph for hpkemain.c:

Functions

• int main (int argc, char **argv)

4.3.1 Detailed Description

An OpenSSL-based HPKE implementation following draft-irtf-cfrg-hpke.

I plan to use this for my ESNI-enabled OpenSSL build (https://github.com/sftcd/openssl) when the time is right.

4.4 hpketv.c File Reference

Implementation related to test vectors for HPKE.

4.4.1 Detailed Description

Implementation related to test vectors for HPKE.

This is compiled in if TESTVECTORS is #define'd, otherwise not.

The overall plan with test vectors is to:

- · define data structures here to store the test vectors
- · have global variables with the actual data
- have a #ifdef'd command line argument to generate/check a test vector
- have #ifdef'd additional parameters to _enc/_dec functions for doing generation/checking

Source for test vectors is: https://raw.githubusercontent.com/cfrg/draft-irtf-cfrg-hpke/master/test json A copy from 20191126 is are also in this repo in test-vectors.json
